# TEST

## INVITED PAPER

- 1 X. Zhao • N. Balakrishnan • J. Sun  
Nonparametric inference based on panel count data

## DISCUSSION

- 43 C.B. Dean • E. Juarez Colunga (comment)  
46 X. He (comment)  
48 H. Ishwaran (comment)  
54 M.C. Pardo (comment)  
58 X. Tong (comment)  
62 J. de Uña-Álvarez (comment)  
65 X. Zhao • N. Balakrishnan • J. Sun (rejoinder)

## ORIGINAL PAPERS

- 72 D.M. Mason • J.W.H. Swanepoel  
A general result on the uniform in bandwidth consistency of kernel-type function estimators
- 95 A.V. Rocha • A.B. Simas  
Influence diagnostics in a general class of beta regression models
- 120 L. Greco  
Minimum Hellinger distance based inference for scalar skew-normal and skew-t distributions
- 138 Y. Goegebeur • A. Guillou  
A weighted mean excess function approach to the estimation of Weibull-type tails
- 163 M. Pauly  
Discussion about the quality of F-ratio resampling tests for comparing variances
- 180 F.J. Marques • C.A. Coelho • B.C. Arnold  
A general near-exact distribution theory for the most common likelihood ratio test statistics used in Multivariate Analysis
- 204 J.M. Bernardo • V.L. Tomazella  
Objective Bayesian reference analysis for the Poisson process model in presence of recurrent events data
