

INVITED PAPER

- 447 P. Doukhan • S. Pröhl • C.Y. Robert
Subsampling weakly dependent time series and application to extremes

DISCUSSION

- 480 C. Velasco (comment)
483 B. Bravo (comment)
487 P. Bertail (comment)
491 S.N. Lahiri • S. Mukhopadhyay (comment)
497 E. Paparoditis (comment)
499 P. Doukhan • S. Pröhl • C.Y. Robert (rejoinder)

ORIGINAL PAPERS

- 503 C. Comas • P. Dalcado • J. Mateu
A second order approach to analyse spatial point patterns with functional marks
- 524 A. Bianco • G. Boente • W. González-Manteiga • A. Pérez-González
Asymptotic behavior of robust estimators in partially linear models with missing responses: the effect of estimating the missing probability on the simplified marginal estimators
- 549 G. Gayraud • K. Tribouley
A goodness-of-fit test for copula densities
- 574 G.S. Datta • M. Ghosh • R. Steorts • J. Maples
Bayesian benchmarking with applications to small area estimation
- 589 B.Z. Poletto • G. Molenberghs • C.D. Paulino • J.M. Singer
Sensitivity analysis for incomplete continuous data
- 607 M. González • M. Mota • I. del Puerto
Weighted conditional least square estimators for bisexual branching processes with immigration
- 630 J.F. Rosco • M.C. Jones • A. Pewsey
Skew t distributions via the sinh-arcsinh transformation
- 653 H. Y. Liang • J. de Una-Álvarez • M.C. Iglesias-Pérez
Local polynomial estimation of a conditional mean function with dependent truncated data

ACKNOWLEDGMENT

- 678 Acknowledgement of refereeing work
