TEST

- 1 N. Salvati • N. Tzavidis • M. Pratesi • R. Chambers
Small area estimation via M -quantile geographically weighted regression
- 29 M. Cao • A.H. Tai • L.-Y. Chan
New statistical distributions for group counting in Bernoulli and Poisson processes
- 54 J.H.J. Einmahl • M. Gantner
Testing for bivariate spherical symmetry
- 74 L. Peng • Y. Qi • I. Van Keilegom
Jackknife empirical likelihood method for copulas
- 93 E.T. Salehi • M. Asadi • S. Eryılmaz
On the mean residual lifetime of consecutive k -out-of- n systems
- 116 A. Freitas • J. Hüsler • M.G. Temido
Limit laws for maxima of a stationary random sequence with random sample size
- 132 E. Liebscher
Model checks for parametric regression models
- 156 I.H. Chang • R. Mukerjee
On the approximate frequentist validity of the posterior quantiles of a parametric function: results based on empirical and related likelihoods
- 170 D. Di Cecco
Conditional exact tests for Markovianity and reversibility in multiple categorical sequences
- 188 R. Gouet • E.J. López • G. Sanz
On δ -record observations: asymptotic rates for the counting process and elements of maximum likelihood estimation
