Volume 27 · Issue 1 · 2009

<i>E. Treviño Aguilar</i> Robust efficient hedging for American options: The existence of worst case probability measures	1
<i>H. Tsukuma</i> Shrinkage estimation in elliptically contoured distribution with restricted parameter space	25
<i>J. Jurečková, J. Picek</i> Minimum risk equivariant estimator in linear regression model	37
<i>A. Schick, W. Wefelmeyer</i> Non-standard behavior of density estimators for sums of squared observations	55
<i>F. Balabdaoui, M. Mielke, A. Munk</i> The likelihood ratio test for non-standard hypotheses near the boundary of the null – with application to the assessment of non-inferiority	75
