

INVITED PAPER

- 1 M.G. Fiestras-Janeiro • I. García-Jurado • M.A. Mosquera
Cooperative games and cost allocation problems

DISCUSSIONS

- 23 E. Patrone (comment)
25 J.M. Zarzuelo (comment)
27 H. Norde (comment)
29 A. van den Nouweland (comment)
33 M.G. Fiestras-Janeiro • I. García-Jurado • M.A. Mosquera (rejoinder)

ORIGINAL PAPERS

- 35 A. Es-Saghouani • M. Mandjes
Transient analysis of Markov-fluid-driven queues
- 54 E. Lazarova • P. Borm • M. Montero • H. Reijnierse
A bargaining set for monotonic simple games based on external and internal stability
- 67 I. Alberto • P.M. Mateo
A crossover operator that uses Pareto optimality in its definition
- 93 M. Hladík
Optimal value bounds in nonlinear programming with interval data
- 107 J. González-Hernández • C.E. Villarreal
Optimal policies for constrained average-cost Markov decision processes
- 121 F.J. Esteban • D.P. Wall
Using game theory to detect genes involved in Autism Spectrum Disorder
- 130 E. Cerdá Tena • S. Quiroga Gómez
Economic value of weather forecasting: the role of risk aversion
- 150 S. Tarashnina
The simplified modified nucleolus of a cooperative TU-game
- 167 M. Gómez-Rúa • J. Vidal-Puga
Balanced per capita contributions and level structure of cooperation
- 177 Y.-J. Lin • C.-H. Ho
Integrated inventory model with quantity discount and price-sensitive demand
- 189 S. Miquel • M. Núñez
The maximum and the addition of assignment games
- 213 R. Rodríguez • M. Luque • M. González
Portfolio selection in the Spanish stock market by interactive multiobjective programming
