

Special issue on Nonlinear and Global Optimization:  
dedicated to Prof. J. J. Júdice sixtieth anniversary  
Guest Edited by José Mario Martínez and Luís Nunes Vicente

EDITORIAL

- 1 J.M. Martínez • L.N. Vicente  
**Special issue on nonlinear and global optimization, dedicated to Professor Joaquim João Júdice on the occasion of his sixtieth anniversary**

INVITED PAPER

- 4 J.J. Júdice  
**Algorithms for linear programming with linear complementarity constraints**

DISCUSSIONS

- 26 M. Anitescu (comment)  
28 S. Dempe (comment)  
30 J.M. Martínez (comment)  
33 H.D. Sherali (comment)

ORIGINAL PAPERS

- 35 I.M. Bomze • L. Grippo • L. Palagi  
**Unconstrained formulation of standard quadratic optimization problems**
- 52 L. Gouveia • P. Moura  
**Enhancing discretized formulations: the knapsack reformulation and the star reformulation**
- 75 J.M. Martínez  
**Generalized order-value optimization**
- 99 H. Lei • G. Laporte • B. Guo  
**A generalized variable neighborhood search heuristic for the capacitated vehicle routing problem with stochastic service times**
- 119 J.B. Lasserre  
**An algorithm for semi-infinite polynomial optimization**
- 130 M.G.C. Resende  
**Biased random-key genetic algorithms with applications in telecommunications**
- 154 S. Amaran • N.V. Sahinidis  
**Global optimization of nonlinear least-squares problems by branch-and-bound and optimality constraints**
- 173 H.D. Sherali • J.C. Smith  
**Dynamic Lagrangian dual and reduced RLT constructs for solving 0–1 mixed-integer programs**
- 190 H.A. Le Thi • A.I.F. Vaz • L.N. Vicente  
**Optimizing radial basis functions by d.c. programming and its use in direct search for global derivative-free optimization**
