4.2 Quality and importance

Este espacio aporta una estructura de arrecifes, de origen artificial, usados para el aprovechamiento tradicional de los recursos marinos. La construcción de los primeros corrales se remonta a la época romana. Sus características ecológicas de gran riqueza, se fundamentan en la presencia de especies animales y vegetales propias de áreas rocosas a la vez de fangos y arenas. En ellos son importantes las comunidades algales de amplia variedad así como las praderas de fanerógamas marinas.
