Los rasgos principales del lugar vienen definidos por la descripción en sus clases de hábitats.

### 4.2 Quality and importance

Este refugio contaba hace veinte años con una colonia de cría de varios miles de *M. myotis* y *M. blythii*. En la actualidad ha habido un claro descenso en la población pero aún sigue teniendo gran interés no sólo porque siguen criando un elevado número de individuos de la especie *M. myotis* y *M. blythii*, sino por el número de especies de crían y el importante número de individuos del murciélago de cueva (*M. schreibersi*) que pasan el invierno en esta cavidad.
