%)

3. ECOLOGICAL INFORMATION

3.1 Habitat types present on the site and assessment for them

[Back to top](#)

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
1310			62.5168			B	C	B	B
1320			343.8424			B	B	B	B
1420			250.0672			B	C	B	B
1510			62.5168			B	C	B	B

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive

92/43/EEC and site evaluation for them

Species					Population in the site					Site assessment

Other Site Characteristics

Los rasgos principales del lugar vienen definidos por la descripción en sus clases de hábitats.

4.2 Quality and importance

Importante para hábitats deficitarios de la Directiva 92/43/CEE. Presencia de lince (Lynx pardina) Este

espacio representa el último refugio para la avifauna protegida, fundamentalmente ardeidas, láridos y límnicolas, asociada al medio acuático de las antiguamente extensas marismas del Tinto. Está constituido por una zona de marisma mareal bien conservada y otra zona, la Dehesa de Alquería, en la que predominan cultivos forestales y agrícolas de secano. La franja de tierra firme situada al Norte está formada por terrenos arcillosos sobre los que discurre un pequeño arroyo cuya desembocadura, al ser cegada de forma artificial, da lugar a la formación de dos pequeñas lagunas de aguas dulces en la que cada año invernan gran cantidad de anátidas y sirve de zona de cría a límnicolas, rálidos y anátidas. La confluencia de ambientes de aguas dulces y saladas, junto con los cultivos agrícolas tradicionales constituyen un interesante ecosistema de especial importancia.

4.4 Ownership (optional)
