- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

Los rasgos principales del lugar vienen definidos por la descripción en sus clases de hábitats.

4.2 Quality and importance

La mina El Galayo se encuentra en una zona donde escasea la disponibilidad de refugios potenciales para ser ocupados por los murciélagos, este hecho unido al número elevado de rinolófos que crían hacen de esta mina una localidad importante para la población de murciélago. La mina La Jabata se encuentra apenas a 100 metros de El Galayo. La población de murciélago ratonero grande y mediano (*M. myotis* y *M. blythii*) que ocupa este refugio es de la más importantes de la zona, en invierno el número de individuos es del orden de >2000i. En verano, la colonia de *Myotis* utiliza alternativamente este refugio y El Galayo.
