

Archivo Histórico Provincial de Cádiz

The Provincial Historical Archive of Cádiz was created by the decree 746/1975 of March 6. The Archive is State owned, but it is now managed by the autonomous government after responsibilities in the field of culture were transferred to the Regional Government of Andalusia.

Its main function is to collect, preserve, describe and offer documentation of the government civil administration and the regional administration in the provincial domain. Thus, it is aimed at meeting the demand of the administration, citizens and historical research.

The access to our records is free of charge according to the legally established procedure.
