## ■ ■ ■ TABLE OF CONTENTS

<b>INTRODUCTION .....</b>	<b>5</b>
<b>FINANCIAL RESOURCES .....</b>	<b>6</b>
Andalusian R&D Own funds (thousand €). 1999-2011 .....	6
GDP mp (base 2008) in Andalusia (million €). 1995-2011 .....	7
R&D internal expenditure percentage in Andalusia on regional GDP. 1995-2011 .....	8
R&D internal expenditure by sectors of performance in Andalusia (thousand €). 1988-2011 .....	9
R&D Internal expenditure by public and private sectors in Andalusia (thousand €).1988-2011 .....	10
R&D Internal expenditure by sectors of performance in Andalusia and Spain (thousand €). 2011 .....	11
Inter-annual variation rate of R&D expenditure in Andalusia. 2000-2011 .....	12
Inter-annual variation rate of R&D expenditure by sectors of performance in Andalusia. 2000-2011 .....	13
<b>HUMAN RESOURCES .....</b>	<b>14</b>
R&D personnel (FTE) employed by sectors of performance in Andalusia. 1997-2011 .....	14
R&D personnel (FTE) employed by public and private sectors in Andalusia. 1997-2011 .....	15
R&D personnel (FTE) percentage employed by public and private sectors in Andalusia. 1997-2011 .....	16
R&D personnel (FTE) by sector of employment and occupation in Andalusia. 1997-2011 .....	17
Personnel employed in R&D in per thousand to active population in Andalusia. 1997-2011 .....	18
Inter-annual variation rate of R&D personnel (FTE) in Andalusia. 2003-2011 .....	19
R&D Researchers (FTE) in Andalusia. 1997-2011 .....	20
R&D researchers (FTE) by sectors of performance in Andalusia. 2003-2011 .....	21
Andalusian Universities teaching staff by gender. 1998-2012 .....	22
Andalusian Universities professors by gender. 2004-2012 .....	23
Andalusian Universities Student body by gender. 1998-2012 .....	24
Andalusian Universities graduates by gender. 1998-2012 .....	25

<b>PAIDI ACTIONS</b> .....	<b>26</b>
Number of R&D Groups in Andalusia. 1988-2011 .....	26
Distribution of R&D Groups by scientific-technical areas of PAIDI. 2011 .....	27
Distribution of R&D Groups by institutions. 2011 .....	28
Funding granted to R&D Groups by institutions (€). 2002-2010 .....	29
Funding granted to R&D Groups by scientific-technical areas of PAIDI (€). 2002-2010 .....	30
R&D Groups average assessment. 2000-2010 .....	31
Personnel of R&D Groups by academic qualification in Andalusia. 1997-2011 .....	32
Number of Excellence Projects in Andalusia. 2005-2011 .....	33
Distribution of Excellence Projects by scientific-technical areas of PAIDI. 2011 .....	34
Distribution of Excellence Projects by institutions. 2011 .....	35
Funding granted to Excellence Projects by institutions (€). 2005-2011 .....	36
Funding granted to Excellent Projects by scientific-technical areas of PAIDI (€). 2005-2011 .....	37
Number of incentives granted to enhance researchers 'mobility and improvement. 2000-2011 .....	38
Percentage of female researchers recipients of R&D groups and excellence projects incentives. 2005-2010 .....	39
<b>INNOVATION</b> .....	<b>40</b>
Number of R&D performing companies by level of technology. 2002-2011 .....	40
Total expenditure on innovative activities in Andalusia (thousand €). 2003-2011 .....	41
Number of companies with innovative activities in Andalusia. 2005-2011 .....	42
Number of innovative companies in Andalusia. 2003-2011 .....	43
Number of EIN companies. 2003-2011 .....	44
Intensity of innovation in Andalusia. 2005-2011 .....	45
<b>OUTPUTS</b> .....	<b>46</b>
Number of patent applications and utility models in Andalusia. 1990-2011 .....	46
Number of ISI documents in Andalusia. 2000-2011 .....	47
Incentives granted to infrastructures, equipment and management by institutions. 2010 .....	48
Summons of the National Plan 2008-2011 in Andalusia by participation modality. 2011 .....	49

Projects approved from National Plan of R&D&I sources. 2000-2011 .....	50
Funding granted to R&D projects of National Plan of R&D&I by institutions. 2000-2011 .....	51
Funding granted to R&D projects of National Plan of R&D&I by scientific-technical áreas. 2000-2011 .....	52
Andalusian participation in the EU Framework Programme. 1990-2011 .....	53
Distribution of the Funding granted by the EU Framework Programme Editions. 2011 .....	54
<b>HIGH TECHNOLOGY .....</b>	<b>55</b>
R&D Internal expenditure in high tech sectors (thousand €). 2000-2011 .....	55
R&D personnel (FTE) employed in high tech sectors. 2001-2011 .....	56
Percentage of employed persons in high tech sectors to total employed persons. 2000-2011 .....	57
Turnover in high-tech sectors (thousand €). 2000-2011 .....	58
<b>BIOTECHNOLOGY .....</b>	<b>59</b>
R&D Internal expenditure in biotechnology in Andalusia (thousand €). 2008-2011 .....	59
R&D Internal expenditure in biotechnology in Andalusia by sectors of performance (thousand €). 2008-2011 .....	60
Percentage of employed persons in biotechnological activities in R&D (FTE) for profiles in Andalusia. 2008-2011 .....	61
<b>ABBREVIATIONS AND ACRONYMS .....</b>	<b>62</b>
<b>GLOSSARY OF TERMS .....</b>	<b>65</b>

## ■ ■ ■ INTRODUCTION

The aim of this report is to provide a preview the state of the Andalusian Science and Technology System in 2011<sup>1</sup>.

In order to achieve this purpose, the Andalusian Knowledge Agency has:

- Compiled, tabulated and graphically represented all the indicators and statistics delivered by the most relevant international, national and regional official entities;
- Developed statistics on the Andalusian researchers 'participation in the Seventh Framework Programme calls for RDI (FP7), the R&D&I National Plan and the Andalusian Research, Development and Innovation Plan 2007-2013 (PAIDI Plan);
- Graphically represented the most relevant variables temporary evolution and, when possible, displayed regionalised information by Autonomous Communities to facilitate comparative analysis.

The information contained in this report is organized into five major sections:

- Financial Resources: Figures reported on public funding provided by the Andalusian Regional Government R&D Budget as well as the R&D internal expenditure by sectors, both in absolute and inter-annual variation rates.
- Human Resources devoted to scientific-technological activities: data offered according to sectors, occupation, academic qualification and gender.
- PAIDI Actions: a set of indicators showing actions undertaken within the frame of the PAIDI Plan, which display the policies and adopted actions evolution.
- Innovation: expenditure on innovative activities; R&D companies regarding its technological level and the number of innovative companies by type, size and intensity of innovation.
- Tangible Outputs: results of R&D&I activities provided by the industrial property registries, by indexed scientific articles as well as by the participation in national and international R&D&I programmes.
- High Technology: indicators shown are R&D internal expenditure, personnel employed to R & D, personnel employed and turnover.
- Biotechnology: R&D internal expenditure by sector of employment and personnel employed to R & D dedicated to biotechnological activities.

The information sources used to develop the aforementioned indicators mainly come from official entities such as: the National Statistics Institute (INE); the Spanish Patent and Trademark Office (OEPM); the Ministry of Economy and Competitiveness (MINECO); the Andalusian Regional Government Budget Economic and Financial Report (Andalusian Regional Ministry for Finance and Public Administration); the General Direction for Research, Technology and Enterprise (DGIT) under the Andalusian Regional Ministry for Economy, Innovation, Science and Employment (CEICE); the Industrial Technological Development Centre (CDTI) and the Institute for Scientific Information (ISI).

---

<sup>1</sup> At the close of this report, some calls have not been resolved for which we considered the latest available to date 2010.

## FINANCIAL RESOURCES

### □ Andalusian R&D Own funds (thousand €). 1999-2011

Note: In 2004 and 2005, the publications of the Economic and Financial Reports differ, according to the budgetary programmes reallocation policies.

## ■ ■ ■ GLOSSARY OF TERMS

**INNOVATIVE ACTIVITY:** All the scientific, technological, organizational, financial and commercial activities which lead actually or potentially to the implementation of innovations. Some of these activities are themselves innovative; others are not novel activities however they are necessary for the implementation of innovations. Innovation activities also include R&D that is not directly related to the development of a specific innovation. (Oslo Manual, 2005)

**HIGH TECHNOLOGY:** The sectors and products within the so-called high technology can be defined, generically, as those which, given their degree of complexity, require a continuous effort in research and a solid technological base. (Methodology of High Technology Indicators, INE)

**TURNOVER:** This includes the amounts invoiced by the company during the reference year for the provision of services and sale of goods that are the object of the company's trade. Deductible VAT invoiced by suppliers will not be included in the valuation. These are accounted for, including the taxes paid on the goods and services, with the exception of the VAT paid by the client. They are accounted for in net terms, deducting returns of sales, as well as volume discounts. Neither cash discounts nor discounts for prompt payment are deducted. (INE Methodology)

**FTE:** The sum of the staff working full-time, and the fractions of time of the staff working part-time, for R&D activities. (EIT, INE)

**EIN COMPANIES:** Innovative businesses or companies with innovations underway or unsuccessful. (Statistics INE)

**INNOVATIVE FIRM:** The company which has implemented an innovation during the period under review. (Oslo Manual, 2005)

**INNOVATION EXPENDITURES:** Expenditures are measured on the basis of the sum of innovation activities over a specific period of time ... An alternative would be to collect information on total expenditures on activities related to individual innovations. (Oslo Manual, 2005)

**INTRAMURAL EXPENDITURES ON R&D:** Intramural expenditures are all expenditures for R&D performed within a statistical unit or sector of the economy during a specific period, whatever the source of funds. (Frascati Manual, 2002)

**R&D:** Research and experimental development (R&D) comprise creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and the use of this stock of knowledge to devise new applications. (Frascati Manual, 2002)

**INNOVATION:** Implementation of a new or significantly improved product (good or service), or process, a new marketing method, or a new organizational method in business practices, workplace organization or external relations. (Oslo Manual, 2005)

**PATENT:** Title that recognizes the right to exclusively exploit a patented invention, preventing others from the manufacturing, sale or use of such invention without the consent of the holder. The patent may refer to a new procedure, new apparatus, a new product or the perfection or improvement of same. The patent is valid for twenty years since the submission application date. To keep a patent in force concession annuities are to be paid. There are three International patent application procedures:

- National: By means of the filing of a patent application in each one of the states in which protection is sought. For example at the Spanish Patent and Trademark Office (SPTO)
- European: The European Patent system allows to obtain protection by means of a European direct patent application with the designation of those European States in which protection is sought, and which are part of the European Patent Convention (24 countries). The European patent application is processed by the European Patent Office (EPO) and the granting of the patent has the same effect as a national patent in all those states in which it is granted.

- International P.C.T. (Patent Cooperation Treaty): The PCT system allows for protection to be claimed for the invention in each one of the States which are party to the international treaty (115 countries as of 1st January 2002), by means of one sole application known as international application. (EIT Methodology, INE)

**R&D PERSONNEL:** Number of personnel employed in R&D:

- Researchers are professionals engaged in the conception or creation of new knowledge, products, processes, methods and systems and also in the management of the projects concerned.
- Technicians and equivalent staff are personnel whose main tasks require technical knowledge and experience in one or more fields of engineering, physical and life sciences or social sciences and humanities. They participate in R&D by performing scientific and technical tasks involving the application of concepts and operational methods, usually under researchers' supervision. Equivalent staff performs the corresponding R&D tasks under the researchers' supervision in the social sciences and humanities.
- Other supporting staff includes skilled and unskilled craftsmen, secretarial and clerical staff participating in R&D projects or directly associated with such projects. (Frascati Manual, 2002)
