Final HeritageCare Workshop on Preventive Conservation of Cultural Heritage

Objectives

The workshop is organised within the framework of the European project HeritageCare (SOE1/P5/P0258) cofounded by the European Regional Development Fund within the Inter-reg-SUDOE program.

The HeritageCare project has arisen in reply to the need of an integrated and sustainable methodology for preventive conservation in South-West Europe in order to help owners and managers of historic buildings.

The event is intended to present the HeritageCare approach and to disseminate the results achieved, offering a live platform where theoretical aspects and practical applications will be combined. The main topics of the workshop are: HeritageCare protocol for onsite inspection, advanced 3D recording strategies, cultural heritage virtualization, information integration and management, historical building information modelling.

Target audience

Owners and managers of historic buildings, professionals, technicians and post-graduate students working in the field of preventive conservation of built cultural heritage.

Enrolment

Participation is free of charge, but enrolment is required. Interested people can register up to July 5, 2019, by sending an email to: heritagecare.espana@gmail.com

Program
