PRESENTACIÓN

El presente boletín de novedades bibliográficas, con periodicidad bimestral pretende ser un instrumento para la difusión de la colección publicaciones seriadas en cualquier soporte, reunidas, conservadas y catalogadas en la Biblioteca del Instituto de Estadística y Cartografía de Andalucía. En él se diferencian dos partes:

- La primera, que contiene los datos relativos a título, ISSN y autor/editor de las publicaciones seriadas que se reciben en la Biblioteca y los números que han llegado en el período cronológico que abarca el boletín. Los títulos de las publicaciones seriadas están ordenados alfabéticamente.
- La segunda, que contiene los sumarios de dichas publicaciones.

Las publicaciones referenciadas en el boletín corresponden a las novedades ingresadas en la Biblioteca del Instituto de Estadística y Cartografía de Andalucía durante los meses de **julio y agosto de 2015** y pueden consultarse gratuitamente en sus instalaciones en la siguiente dirección:

On the cover

A deal between Greece and its creditors would be best. But if there has to be a Grexit, here is how to do it: leader, page 11. To stay in the euro zone, Greece's prime minister will have to jettison almost every promise he has made, page 19. The No vote felt good at the time, but did nothing to resolve the problems ahead, page 21. Could a parallel currency within the euro zone be possible? Page 21. The financial system is barely hanging on, page 22

J.J. Rousseau

Quién es quién	2	La infancia constituye una de las realidades sociales más determinantes a la hora de evaluar el nivel de bienestar y progreso de una sociedad. En este número trataremos de atender al conjunto de estadísticas que en nuestro país se encargan de estudiar las condiciones de vida de los niños.
Un plan para la estadística española en 2020	3	
La Nota	7	
Entrevista a Jorge Cardona Llorens	9	En las primeras páginas de este número y bajo el título de “ Un plan para la estadística española en 2020 ” se recogen los principales retos del Sistema Estadístico en los próximos años y el papel que jugará el INE en estos cambios.
Antonio Argüeso Evolución de la población menor de 18 años en los últimos años	13	
Cristina Guisande Allende Población infantil en Cataluña: la perspectiva censal	16	Comenzamos el tema de portada con una introducción de Jorge Úbeda a la idea de contar/cuantificar los niños y su importancia para la sociedad. Entrevistamos a Jorge Cardona , miembro del Comité de los Derechos del Niño, sobre el cuidado y la protección a la infancia y qué información necesitamos para ello. En el primero de los artículos, firmado por Antonio Argüeso , se analiza la evolución de la población infantil en los últimos años y su proyección a futuro. A continuación, Cristina Guisande , a partir de los datos del Censo, estudia las formas de convivencia de la población infantil en los hogares catalanes y sus características principales. El artículo de José Luis Castellanos enfoca las estadísticas de protección a la infancia y, en concreto, de la Estadística Básica de Medidas de Protección a la Infancia (EBMPI), elaborada por el Observatorio de la Infancia en colaboración con las Comunidades Autónomas. Entrevistamos a Salomé Adroher , Directora General de Servicios para la familia y la infancia del Ministerio de Sanidad, Servicios Sociales e Igualdad, que nos habla de las principales problemáticas de los niños en España y qué medidas deberían adoptarse para mejorar su situación. A continuación, Conchi Ballesteros detalla las observaciones que, durante los últimos años, ha realizado el Comité de los Derechos del Niño sobre las estadísticas de infancia en España, los progresos que se han realizado y lo que queda por hacer. En este sentido, el artículo de M^a Ángeles Espinosa y Esperanza Ochaíta propone un Sistema de Indicadores basado en la teoría de las necesidades infantiles y adolescentes que permita estudiar su realidad desde un enfoque multidimensional. Ana Berástegui y Blanca Gómez nos presentan una panorámica de la adopción internacional en España a partir de la información de la (EBMPI) y Pau Marí-Klose y Marga Marí-Klose elaboran una propuesta de protección social contra la pobreza infantil mediante transferencias monetarias. Por último, Caterina Calsamiglia y Annalisa Loviglio analizan las consecuencias de un sistema inflexible de escolarización por año de nacimiento.

Noticias	2	En este número de Índice realizaremos un análisis de algunas estadísticas que nos permiten un mejor conocimiento del mar. El texto “El agua y las cifras” de Sergio M. Rodríguez presenta su importancia en nuestra sociedad y los intentos de cuantificar las actividades relacionadas con él a lo largo de la historia.
La Nota	4	
Entrevista a Eduardo Balguerías Guerra	6	
Paloma Seoane Spiegelberg y Miguel Ángel Cordón Marín Estadísticas pesqueras	9	En la primera de las entrevistas, Eduardo Balguerías , director del Instituto Español de Oceanografía, nos habla sobre las actividades que lleva a cabo esta histórica institución, que cumple ahora 100 años, y que estudia y cuida de nuestro mar y nuestras costas. Comenzaremos los artículos del tema de portada con las estadísticas pesqueras, cuya metodología y elaboración nos explican Paloma Seoane y Miguel Ángel Cordón del Ministerio de Agricultura, Alimentación y Medio Ambiente. A continuación, Óscar Souto , de Puertos del Estado, analiza las estadísticas de tráfico portuario. Desde el ISTAC, Domingo Jesús Lorenzo y Rubén Afonso Trujillo , hacen una propuesta metodológica para la cuantificación del sector marino-marítimo para Canarias.

Antonio Bode, Isabel González Herraiz, Dolores Garabana, Paz Sampredo y A. Celso Fariña Un mar de números: estadística y análisis de datos en el Instituto Español de Oceanografía	32	A continuación, Lucía Pérez desarrolla la labor de la Sociedad de Salvamento y Seguridad Marítima, que consiste en el salvamento de personas, la lucha contra la contaminación y el control del tráfico marítimo. El siguiente artículo, firmado por Antonio Bode, Isabel González, Dolores Garabana, Paz Sampredo y A. Celso Fariña , versa sobre las investigaciones desarrolladas en el Instituto Español de Oceanografía a partir del análisis estadístico de la gran cantidad de información recopilada por ellos en nuestros mares. También Celia Ojeda y Pilar Marcos , de Greenpeace, analizan las estadísticas del mar y las costas para medir el grado de explotación y sobrepesca que sufren. Por último, Patricia Recio , del Museo Nacional de Arqueología Subacuática, nos detalla la evolución de sus visitantes según sus exposiciones.
